

I can use multiplication facts to make deductions.

Use your times table and number knowledge to decide which answer could be correct. **You don't need to work out the correct answer!**

Explain **why** it could be the correct answer.

$18 \times 10 =$	165	182	180
------------------	-----	-----	-----

How did you know?

$38 \times 2 =$	76	75	79
-----------------	----	----	----

How did you know?

$19 \times 5 =$	84	95	93
-----------------	----	----	----

How did you know?

$15 \times 5 =$	75	40	45
-----------------	----	----	----

How did you know?
