

Parent Guide

How can I use this with my children?

Print and cut out the twenty butterflies. Read each fraction to your child and help them count the total number of butterflies before separating them into two equal groups on the flowers.

How does this help my children's learning?

This activity can help your child separate larger amounts into halves and quarters.

Ideas for further learning:

Using practical objects – such as sweets or toys – ask your child to find a half or a quarter of the group. Do this with different amounts of objects.

Butterfly Fractions:

Finding Half of a Quantity

Cut out the butterflies and the flowers and use them to help you answer the questions below.

1. $\frac{1}{2}$ of 10 = _____

2. $\frac{1}{2}$ of 14 = _____
