

Task: To create your own colour pallet

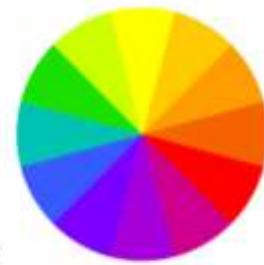

Key vocabulary.

- Tint: a colour diluted, often with white; pale in colour from original hue.
- Hue: colour, original colouring.
- Shade: a colour darkened, usually by the use of black.
- Tone: a colour changed usually with the addition of grey.

Artists use a colour wheel. There are twelve colours.

Yellow
 Yellow-orange
 Orange
 Red-orange
 Red
 Red-violet (magenta)
 Violet
 Blue-violet (purple)
 Blue
 Blue-green (turquoise)
 Green
 Yellow-green (chartreuse)

These three are the most important - they are called the **primary** colours.

If you mix any of these three colours you get these hues - they are called the **secondary** colours.

There are still other colours left in the wheel - the **tertiary** Colours.

Tertiary colours are made up of approximately $\frac{1}{3}$ primary and $\frac{2}{3}$ secondary.
