

Writing an evaluation for your vehicle.

What went well:

- 1) What do you like most about your vehicle.
- 2) What strengths do you think your vehicle has? Size, shape, movement, do the wheels move, could it carry something?
- 3) What part of your vehicle did you enjoy making the most?

What you learnt and what you might improve:

- 1) Did you have to overcome any tricky challenges?
- 2) What did you find most difficult about building your vehicle?
- 3) If you could make one wish about your vehicle what would that be?
