

L1: To create your own Anglo Saxon house.

Task: using bits and bobs you have found over the last week, create your own version of an Anglo Saxon house. Think about the drawing you did and your knowledge of such houses.

To add effect to your design, you may want to see if you can collect some sticks from your garden or local woods/parks.

Moss can give a lovely effect of grass, and below you can see how the simple effect of cutting a piece of paper to create a fringe effect works well for the roofs.

Lolly sticks, if available are a good alternative to the sticks and real straw or even paper straws can also look great!

Have a go with whatever you can find around you and be as creative as you like!
