

$$14 + 6 = 20$$

$$6 + 14 = 20$$

$$15 = 10 + 5$$

$$15 = 5 + 10$$

$$4 + 14 = 18$$

$$14 + 4 = 18$$

$$14 + 0, 13 + 1, 12 + 2, 11 + 3, 10 + 4, 9 + 5, 8 + 6, 7 + 7, 6 + 8, 5 + 9, 4 + 10, 3 + 11, 2 + 12, 1 + 13, 0 + 14$$

Bob is wrong. 20 has 21 number bonds. The children should write these number bonds systematically and represent them using equipment.

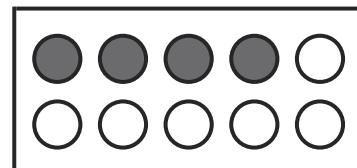

Bob has 20 bricks. 12 are red

- the rest are yellow.

$$12 + 8 = 20$$

$$8 + 12 = 20$$

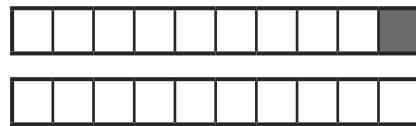

$$6 + 4 = 10$$

$$4 + 6 = 10$$

Bob has 10 pots of paint. 7 are black - the rest are white.

$$7 + 3 = 10$$

$$3 + 7 = 10$$

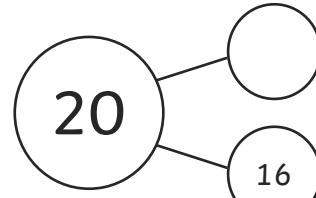

$$1 + 19 = 20$$

$$19 + 1 = 20$$

Bob has 10 buckets. 2 are black - the rest are yellow.

$$2 + 8 = 10$$

$$8 + 2 = 10$$

$$16 + 4 = 20$$

$$4 + 16 = 20$$

children may also write the number sentences starting with the total, e.g. $20 = 16 + 4$
